

Reports, Seminars and Master Thesis

Report “Software Specification and Design”

Introduction & Company Overview

Role & Tasks

Project

Tools & Frameworks

Specification:

- Purpose, Scope, Users, Constraints
- Functional Requirements
- Non-functional Requirements
- User Stories
- Use Case Diagrams & Use Case Descriptions (ID, Name, Actors, Preconditions, Postconditions, Normal Flow, Alternative Flows & Exceptions)
- (External) Interfaces
- Mockups

Design:

- System Architecture (Context Diagram, Component Diagrams)
- UML Diagrams (Class Diagrams, Sequence Diagrams, Activity Diagrams)

Conclusion

Report “Software Validation”

Introduction & Company Overview

Role & Tasks

Project

Tools & Frameworks

Code Reviews

Testing:

- Unit Testing, API Testing, Load Testing
- Test Cases (ID, Description, Preconditions, Test Steps, Test Data, Expected Result, Actual Result, Postconditions, Status ...)

Validation:

- Sprint Review
- User Story Testing
- Acceptance Testing
